## SUMMARY

Backend-focused Software Engineer with 1+ year of experience building production-grade REST APIs and scalable systems at Epic Web Service. Skilled in Node.js, NestJS, TypeScript, and SQL databases with hands-on expertise in JWT auth, RBAC, payment integrations, and modular architecture. Actively expanding into React Native and system design.

## EXPERIENCE

### Backend Developer — Epic Web Service

June 2025 – Present

Mohali, India

- Designed and shipped a full-fledged **Studio Management Platform** serving 10+ studios with 20+ feature modules, built on NestJS, TypeScript, and Sequelize (SQL).
- Architected a 4-tier **Role-Based Access Control (RBAC)** system (Super Admin, Studio Owner, Manager, Crew) with JWT authentication, guards, and studio-scoped permissions.
- Integrated **Razorpay payment gateway** with secure webhook handling for order capture, signature verification, and transaction reconciliation.
- Built a **cross-platform push notification service** with device token management (iOS/Android) and last-active tracking for targeted delivery.
- Optimized database queries and Sequelize associations to reduce response latency on high-traffic endpoints; enforced DTO validation and guard-level checks across all routes.
- Followed NestJS modular best practices — providers, interceptors, exception filters — for maintainable, testable, production-ready code.

## PROJECTS

### My Daily Buddy — Personal Project | Node.js, NestJS, MySQL, REST APIs

- Building an all-in-one daily life management app for Indian users, featuring routine and reminder management, habit tracking, basic health tracking, and an Indian food calorie database.
- Designed a modular backend architecture allowing users to toggle features on/off, with scalable APIs for OTP-based authentication, reminders, and user data management.

### Open-Source NPM Packages — Published as [dheeraj08](#) | Node.js, JavaScript

- Authored and published 4 zero-dependency NPM packages targeting India-specific developer use cases: **rupee-india** (₹ formatter with lakh/crore support), **numindia** (Indian mobile number validation), **indian-pincode** (PIN code lookup with state/district data), and **gstin-utils** (GSTIN validation, parsing, masking).
- Maintained packages with semantic versioning, MIT licensing, and active weekly downloads on the npm registry.

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Java, C++, SQL

**Backend:** Node.js, NestJS, Express, REST APIs, JWT, Sequelize, RBAC, Webhooks

**Frontend:** React.js, Next.js, HTML, CSS (Learning: React Native)

**Databases:** MySQL, PostgreSQL, MongoDB

**Tools & Platforms:** Git, GitHub, Postman, Razorpay, AWS (basics), Linux/macOS

**Concepts:** System Design, Data Structures & Algorithms, OOP, OS, Computer Networks

## EDUCATION

### B.Tech, Information Technology — Chandigarh Engineering College (CGC Landran)

2021 – 2025

CGPA: 8.10 / 10

## CERTIFICATIONS & ACHIEVEMENTS

- Namaste Node.js** — Backend Development with Node.js (Akshay Saini)
- DSA in Java** — Apna College | **MERN Stack Training** — SkillStone × CGC Landran
- AWS Data Analytics & Cloud Security Foundations** — CGC Landran | **Smart India Hackathon 2023**; 1st Runner-Up — Brainy Bunch Idea Presentation Competition
